

**ADR-001: The Repository Folder name must be
portal/**

Project Genesis Research Repository

Generated: July 2026

ADR-001: The Repository Folder name must be \textttportal/

Status

Approved

Context

The directory structure needs a clear identifier for the web-facing component.

Decision

We use \textttportal/ instead of \textttwebsite/, \textttfrontend/, or \textttsite/.

Consequences

Future desktop client binaries or visualization clients can sit alongside it in the repository under their own subdirectories (e.g., \textttclient/) without architectural confusion.
